

Proposed BMSS Course: GC-MS Data Interpretation
Monday 16th April 2012
AstraZeneca Conference Facility
Alderley Park

The BMSS is proposing to run a second course, on **GC-MS Data Interpretation**, on the Monday prior to its 2-Day Annual Meeting (Tuesday 17th & Wednesday 18th April 2012), in parallel to its Introduction to MS course. The cost would be around £250 per attendee

BMSS would partner with Crawford Scientific in delivering the interpretation course and the content would be based on Crawford's [established course](#) but with the addition of more real-life examples and input from industry. The informal, small workshop approach would

- Give attendees the opportunity to learn new skills in assessing the quality of library matches and in fundamental data interpretation
- Enable them to practice these skills by interpreting many example spectra under supervision.

If you would be interested in attending such a **GC-MS Data Interpretation** course please e-mail Anna Upton at BMSSAdmin@btinternet.com so we can assess if there would be enough attendees to make this a viable course.

Attendance at the Annual Meeting is NOT required for attendance on the courses.
