Dear Mike

I write to express the strong support of Protein Metrics for the British Mass Spectrometry Society's bid to hold the 28th International Mass Spectrometry Conference in Liverpool, UK in 2030.

IMSC is a very significant meeting in the international Mass Spectrometry calendar and with increasing importance of data analysis including AI/ML Protein Metrics is keen to help and express our support for the conference.

Protein Metrics is part of Siemens Digital Industry Software (DISW) and provides industry leading software solutions for the analysis of Biologics and Oligonucleotides by mass spectrometry. Liverpool is a key UK science hub, with strong expertise in proteomics and clinical research, where mass spectrometry supports advances in biomarker discovery, drug analysis, and infectious disease research, therefore is a fitting location to host IMSC 2030. Protein Metrics looks forward to supporting IMSC30 in Liverpool.

Good Luck
David
