Re: IMSC 2030 - Application from the British Mass Spectrometry Society

Dear Mike Morris,

I write to express the strong support of SCIEX for the British Mass Spectrometry Society's bid to hold the 28th International Mass Spectrometry Conference in Liverpool, UK in 2030.

IMSC is a very significant meeting in the international Mass Spectrometry calendar and has been supported by SCIEX over many years. We are keen to continue our support for this excellent series of conferences.

Liverpool is a key UK science hub, with strong expertise in proteomics and clinical research, where mass spectrometry supports advances in biomarker discovery, drug analysis, and infectious disease research, therefore is a fitting location to host IMSC 2030. SCIEX looks forward to supporting IMSC30 in Liverpool.

Yours sincerely.
