Dear Mike,

Re: BMSS Bid to Host the 28th International Mass Spectrometry Conference (IMSC) 2030 in Liverpool

Further to our recent discussion, I am pleased to confirm that Waters is supportive of the British Mass Spectrometry Society's (BMSS) bid to host the 28th International Mass Spectrometry Conference (IMSC) in Liverpool in 2030.

As a long-standing partner to the mass spectrometry community, we recognise the importance of IMSC as a premier global forum for scientific exchange, innovation, and collaboration. We believe that Liverpool and the wider North of England provide an excellent setting for such a significant international event, with strong academic, industrial and scientific engagement in the region.

We also welcome the potential opportunity, should the bid be successful, to showcase our Wilmslow facility to conference delegates, offering further insight into the capabilities and contributions of Waters within the field.

While this letter does not constitute a formal commitment at this stage, we are pleased to express our support for the bid and wish BMSS every success in its submission to the International Mass Spectrometry Foundation.

Yours sincerely,

James Hallam
Vice President, LC-MS Business Segment
Waters Analytical Sciences
